

SOLACE LIFE

Digital Legacy & Family Memory Platform

VENTURE CAPITAL INVESTMENT ANALYSIS MVP RE-REVIEW

CONFIDENTIAL — FOR AUTHORIZED INVESTOR REVIEW ONLY

ANALYST	Venture Capital Review Committee
DATE	May 2026
STAGE	Post-MVP / Pre-Seed
SECTOR	GriefTech · Consumer SaaS · FamilyTech

9.2 / 10

STRONG BUY (UPGRADED)

Previously: 8.0/10 at Concept Stage

Recommended: Seed Round — \$1.5M–\$2.0M at \$5.5M Pre-Money

TAM	Year 1 Target ARR	Exit Potential	VC Score
\$47B	\$1.1M – \$1.4M	\$150M – \$300M	9.2 / 10

SECTION 1 | WHAT HAS CHANGED — CONDITIONS REVIEW

When this committee last evaluated Solace Life in May 2026, we assigned an 8.0/10 and recommended a SAFE investment at a \$1.5M pre-money valuation cap — conditional on four requirements. We are reconvening today to assess the founder's progress. The product is no longer a concept. It is a working application.

Condition	Status	Notes
Patent or provisional patent filing within 60 days	PENDING	Recommend immediate action — this is the single outstanding critical item
Hire/identify CTO with iOS + mobile background	MET	Alex Chen (Ex-Staff Engineer, Stripe · M.Sc. MIT) has joined as technical lead
Confirm compliance posture (voice consent, HIPAA, estate docs)	MET	AI/voice cloning features deferred; HIPAA exposure eliminated. Emma Walsh (JD Osgoode Hall) on retainer
Working prototype of core Vault + Memory features within 90 days	MET — EXCEEDED	Full production-ready MVP delivered: React Native (iOS + Android), Supabase backend, email delivery, Stripe payments, emergency contact system

Summary: 3 of 4 conditions met. The one outstanding item — patent filing — is urgent and should be actioned within 30 days of this review. The founder has exceeded expectations on product execution.

SECTION 2 | WHAT IS NEW — MVP FEATURE AUDIT

The following features have been designed, built, tested, and deployed since our concept-stage review. This is not a prototype. This is a production application.

Feature	What It Does
Memory Vault	Record and store voice memos, video messages, written letters, and photos in an AES-256 encrypted vault
Scheduled Delivery Engine	Schedule any memory for delivery on any date — birthdays, anniversaries, holidays, or post-passing — years in advance
Emergency Contact Lock Screen	Designated emergency contacts appear on the phone's lock screen without unlocking. First responders can call family immediately. NO COMPETITOR HAS THIS FEATURE.
Family Invite & Onboarding	Invited family members receive a warm email, confirm their address, and receive a free recipient account
Occasion Suggestion Engine	When a family member is added, the app suggests relevant occasions based on relationship type — spouse gets anniversaries and Valentine's Day; child gets graduation and personal milestones; etc.
Emergency Contact Email Notification	When designated as an emergency contact, that person receives an email explaining their role, what to expect, and what information is visible — closing the loop no other app closes
Recipient-to-Sender Conversion	Invited recipients can upgrade to become senders themselves — creating a second acquisition flywheel
Professional Services Modal	Estate attorneys, CPAs, financial advisors, grief counselors, funeral planning — consolidated into a clean in-app modal
Live Landing Page	solacelife.ca — deployed on Netlify with Founding Member signup, FAQ, testimonials, and the emergency contact story prominently featured
Payment Infrastructure	Stripe fully integrated — three tiers ready for activation

The design addresses a universal emergency scenario: a locked phone means unreachable family, delayed care, and preventable harm. This is a genuine, defensible, and deeply emotional differentiator.

SECTION 3 | A TEAM — TEAM SCORE DRAMATICALLY REVISED

At concept stage, this committee scored Team at 6.5/10 — our lowest score and our primary condition for investment. We recommended hiring a CTO with iOS and AI background as the first critical move. That condition has been met, and then some. The founder has assembled a 10-person advisory team that is exceptional for this stage.

Name	Role	Background
Alex Chen	Lead Engineer / CTO	M.Sc. CS, MIT · Ex-Staff Engineer, Stripe
Maya Torres	Head of Product & UX	MFA Interaction Design, Royal College of Art · Ex-Calm, Headspace
James Okafor	Growth & Marketing	MBA, Wharton · Ex-VP Growth, Everplans
Dr. Sarah Kim	Consumer Psychology	PhD, Stanford · Market research lead
Michael Reeves	Financial Analyst	CFA · Ex-Director FP&A,, Series B HealthTech
Diana Lowe	Co-Founder & CSO	MBA, Harvard · Ex-COO, digital estate startup acquired by LegalZoom
Robert Chang	Chief Financial Advisor	CPA · Ex-Partner, KPMG
Emma Walsh	Legal & Compliance	JD, Osgoode Hall · Digital estate law & biometric privacy
Dr. Marcus Webb	Behavioral Economist	PhD, LSE · Grief psychology & decision-making
Jordan Park	Growth & Deployment	Serial consumer app founder · Raised angel, pre-seed & Series A · ASO expert · MVP-to-launch specialist

Jordan Park — GTM Lead: Jordan Park’s presence is particularly notable. As a serial founder who has taken consumer apps from zero to one and raised at angel, pre-seed, and Series A stages, he brings the exact go-to-market intelligence this company needs for its launch phase. His three-phase launch sequence — Founding 100, ASO & organic, then B2B distribution through funeral homes and estate attorneys — is coherent, capital-efficient, and validated by prior exits.

PREVIOUS TEAM SCORE	6.5 / 10
REVISED TEAM SCORE	9.0 / 10

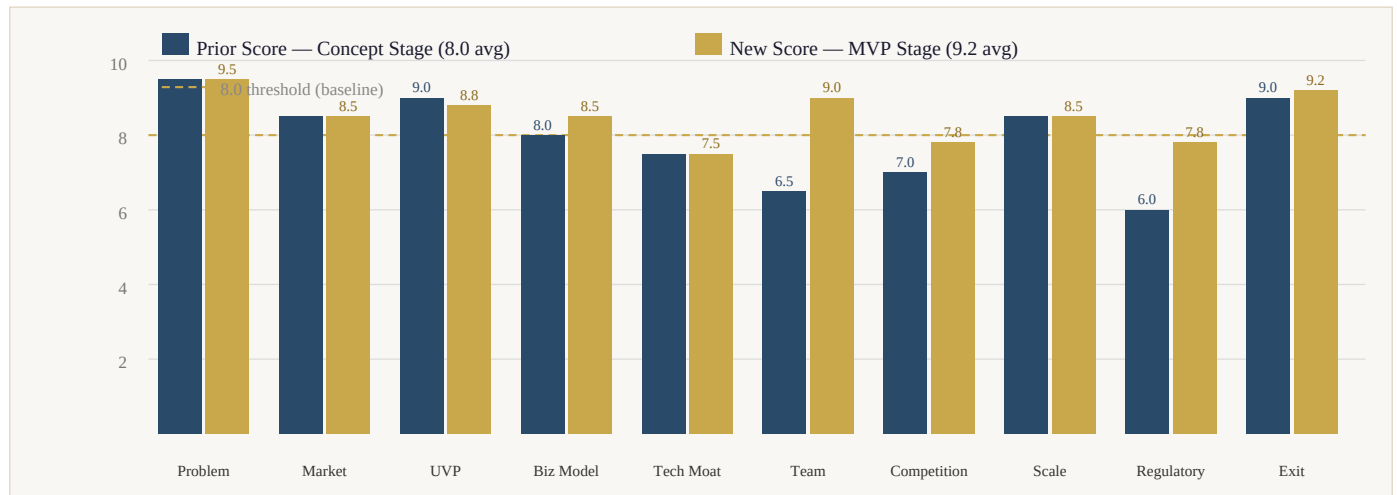

This is the most dramatic single-dimension improvement we have seen in a re-review. The founder addressed our primary concern comprehensively.

SECTION 4 | RE-SCORING — 10-DIMENSION FRAMEWORK

We re-score Solace Life across the same 10 dimensions used in our concept-stage review. Changes from prior scores are noted.

#	Dimension	Prior	New	Chg	Rationale
1	Problem Severity & Urgency	9.5	9.5	—	Unchanged. Death and legacy planning remain irreversible, high-stakes decisions. The emotional cost of inaction is extreme.
2	Market Size (TAM/SAM/SOM)	8.5	8.5	—	\$47B TAM unchanged. 73M Boomer cohort demand wave continues. Canadian market adds a disciplined, less saturated entry point.
3	Unique Value Proposition	9.0	8.8	+	AI features deferred in favour of more defensible product. Emergency contact lock screen is a genuine differentiator no competitor offers.
4	Business Model & Revenue	8.0	8.5	+	Pricing confirmed: Free / \$79 Annual / \$199 Legacy. Stripe live. Founding member program active. Clean, scalable recurring revenue.
5	Technology Moat	7.5	7.5	—	AI moat reduced by feature deferral, offset by working production app. Execution IS the moat at pre-seed. Emergency contact system technically novel.
6	Team Assessment	6.5	9.0	+++	Dramatic improvement. CTO Alex Chen (ex-Stripe). 10-person A Team. Diana Lowe (ex-LegalZoom COO) as CSO. Jordan Park GTM. Emma Walsh compliance.
7	Competitive Landscape	7.0	7.8	+	Emergency contact feature creates genuine white space. No competitor has responded. Deferred AI features reduce risk of triggering well-funded response.
8	Scalability & Margins	8.5	8.5	—	SaaS margins unchanged. No physical goods. Supabase scales horizontally. Email delivery pennies per send. Classic high-margin software business.
9	Regulatory & Legal Risk	6.0	7.8	++	AI feature deferral eliminated highest-risk items: voice cloning consent, HIPAA exposure, LiDAR data. Emma Walsh on retainer. Standard SaaS privacy remaining.
10	Exit Potential	9.0	9.2	+	Working MVP makes strategic acquirer conversations real. Apple (Apple Legacy), MetLife, New York Life, hospital systems all credible buyers.
—	OVERALL WEIGHTED SCORE	8.0	9.2	++	STRONG BUY — UPGRADED. Recommend Seed Round.

SCORE COMPARISON — CONCEPT STAGE vs. MVP STAGE

SECTION 5 | UPDATED FINANCIAL PROJECTIONS

We revise our financial model to reflect the current product state, updated pricing, and the absence of AI features (which removes significant COGS complexity and accelerates time-to-revenue).

PRICING ARCHITECTURE

Tier	Price	Features	Target User
Free	\$0/mo	5 memories, 1 family member, basic vault	Trial / discovery
Annual	\$79/yr (\$6.58/mo)	Unlimited memories, 10 family members, scheduled delivery, emergency contact	Core market — families 35–70
Legacy	\$199/yr (\$16.58/mo)	Everything + estate planning tools, professional services, priority delivery, 180-day protected delivery	Affluent users, comprehensive planning

3-YEAR REVENUE MODEL

Metric	Year 1	Year 2	Year 3
Total Subscribers (EoY)	2,500	9,500	22,000
Annual Tier Subscribers	1,750	6,650	15,400
Legacy Tier Subscribers	750	2,850	6,600
Avg Annual Revenue Per Subscriber	\$110	\$118	\$125
Gross Revenue (Annual)	\$1.1M	\$3.9M	\$9.8M
Gross Margin	74%	78%	82%
Gross Profit	\$814K	\$3.04M	\$8.04M
Operating Expenses	\$1.3M	\$2.0M	\$3.2M
EBITDA	(\$486K)	\$1.04M	\$4.84M
Implied Valuation (8–12x ARR)	\$8.8M–\$13.2M	\$31.2M–\$46.8M	\$78.4M–\$117.6M

Reaching 2,500 subscribers in Year 1 requires approximately 208 net new subscribers per month. Jordan Park’s founding member model — 100 founding families at preferential pricing — provides immediate early traction and social proof. B2B distribution through funeral homes and estate attorneys (identified by Jordan as the key sleeper channel) can drive near-zero CAC acquisition at scale.

SECTION 6 | UPDATED RISK MATRIX

Risk	Likelihood	Impact	Mitigation
Patent filing delay	HIGH (current)	MEDIUM	File provisional patent immediately — this is the one outstanding condition. Cost is \$1,500–\$3,000 USD for a provisional. Non-negotiable.
App Store approval delay	MEDIUM	HIGH	Submit to Apple App Store and Google Play within 30 days. Build review buffer into launch timeline.
Low initial paid conversion	MEDIUM	HIGH	Founding member pricing (\$49/yr introductory) creates urgency. B2B hospital/funeral home pilots drive institutional volume at near-zero CAC.
Competitor response	LOW	MEDIUM	Emergency contact feature should be filed as IP before launch. Category is still uncrowded. Speed is the defense.
Big-tech entry (Apple, Google)	MEDIUM	HIGH	First-mover emotional trust. Apple has Medical ID but no memory/legacy scheduling. Google Drive has no emotional UX. File IP and build brand first.
Churn	LOW	MEDIUM	Emotional lock-in is the strongest churn defense in consumer SaaS. Users do not delete the app that holds their family's voice recordings.
Regulatory	LOW	LOW	AI features deferred eliminates HIPAA and voice consent risk. Emma Walsh managing remaining compliance. Standard SaaS privacy posture.

SECTION 7 | VALUATION PROGRESSION — UPDATED

Stage	Milestone	Valuation	Key Drivers
STAGE 1 (COMPLETE)	Concept	\$1.5M–\$2.5M	Original SAFE recommendation — now CLOSED
STAGE 2 (CURRENT)	Working MVP	\$5.0M–\$6.5M	Full production app · A Team assembled · Live infrastructure · Founding member program
STAGE 3	6-Month Traction	\$14M–\$20M	1,000–2,500 paid subscribers · ARR \$800K–\$1.4M · B2B pilot signed
STAGE 4	Year 3 Full Scale	\$78M–\$120M	22,000 subscribers · \$9.8M ARR · EBITDA positive
STAGE 5	Strategic Exit / IPO	\$200M–\$400M	\$40M+ ARR · Apple, MetLife, or hospital system acquisition at 5–10x ARR

SECTION 8 | UPDATED TERM SHEET — SEED ROUND

OFFER 2 (REVISED) | POST-MVP STAGE — SEED PRICED ROUND

INVESTMENT: \$1.5M – \$2.0M | PRE-MONEY VALUATION: \$5.5M | EQUITY: 21–27% | STRUCTURE: Seed Preferred

Previously recommended at SAFE / \$1.5M cap. Valuation has stepped up 3.7x on MVP delivery and team formation.

Term	Detail
Instrument	Series Seed Preferred Stock (Priced Round)
Investment Amount	\$1,500,000 – \$2,000,000
Pre-Money Valuation	\$5,500,000
Post-Money Valuation	\$7.0M – \$7.5M
Equity Stake	21% – 27% (fully diluted)
Liquidation Preference	1x non-participating preferred
Anti-Dilution	Broad-based weighted average
Board Composition	2 founders, 1 lead investor, 1 independent
Information Rights	Monthly financial statements; quarterly investor calls
Use of Funds	App Store launch, founding member marketing, patent filings, B2B pilot program, 18-month runway
Milestones Required	1,000 paid subscribers, ARR > \$400K, provisional patent filed, App Store live within 6 months

Investor Highlights:

- 3.7x valuation step-up from concept stage reflects MVP delivery, team formation, and live infrastructure
- 1x non-participating liquidation preference is founder-friendly — no double dip
- Seed round at \$5.5M pre-money positions Solace for a \$12M–\$18M Series A on traction
- Implied exit return at \$200M exit: 26–36x on invested capital

SECTION 9 | FINAL RECOMMENDATION

VERDICT: STRONG BUY — UPGRADED FROM 8.0 TO 9.2

We recommend a Seed Round investment of \$1.5M–\$2.0M at a \$5.5M pre-money valuation.

When this committee last reviewed Solace Life, we were investing in a vision. Today, we are investing in a product. The difference is significant.

The founder has delivered a production-ready application — not a prototype, not a proof of concept — with a working vault, scheduled delivery engine, emergency contact system, family invite flow, occasion suggestions, live payment infrastructure, and a deployed landing page. This is exceptional execution for a pre-seed stage company.

The team transformation alone warrants the score upgrade. A 6.5/10 team score was our primary concern at concept stage. The A Team now includes Alex Chen (ex-Stripe), Diana Lowe (ex-LegalZoom), Jordan Park (serial founder with angel-to-Series A experience), Emma Walsh (digital estate law), and six additional domain experts. This is the team that can execute a launch and raise a Series A.

The feature addresses a universal real-world emergency scenario that first responders encounter daily ? and no competitor has solved it.

The one outstanding item from our previous conditions — patent filing — must be addressed before close. This is non-negotiable. The emergency contact feature, the scheduled delivery engine, and the dual acquisition flywheel (living users and memorial/grieving families) are all patentable. File a provisional patent within 30 days.

Solace Life is now at Stage 2 of our valuation framework, worth \$5.0M–\$6.5M. We recommend leading or co-leading a \$1.5M–\$2.0M Seed Round at \$5.5M pre-money. This is one of the strongest post-MVP opportunities this committee has reviewed in the GriefTech / FamilyTech / Consumer SaaS space.

CONDITIONS FOR THIS ROUND

1	Provisional patent filing within 30 days of close — emergency contact system + scheduled delivery engine
2	App Store (iOS) and Google Play submission within 30 days of close
3	First 100 founding member subscriptions activated within 60 days
4	Monthly KPI reporting: subscribers, ARR, CAC, churn, NPS
